

PRODUCT INFORMATION

Brisa[®] Random freestanding wall system with wall end and cap end units.

New accessories are now available for the Brisa[®] wall system, a design inspired by split limestone. Three-sided cap end unit and wall end units save installation time, minimize cutting and improve aesthetics, compared to other options for ending a wall in a multiheight, Random or 6-inch multipiece system.

Accessory Units	Cap End	Wall End**
Approximate Dimensions*	3" x 8" x 13 1/2"	6" x 8" x 11"
Approximate Weight*	21 lbs.	36 lbs.

*Product dimensions are height by face length by depth. Actual dimensions and weights may vary from these approximate values due to variations in manufacturing processes. Specifications may change without notice. See your Anchor representative for details, color options, block dimensions and additional information.
**Wall end has three different face patterns that coordinate with wall system.

INSTALLATION GUIDELINES

**End a wall without a column**

End installation pattern next to a wall end unit if the wall does not end with a column.

Cut every other wall end unit in half. Glue all units.

If a wall end unit is not available in your market, either:

- see your dealer for a template to guide cutting corner/column and wall units to finish end; or
- visit anchorwall.com for installation instructions and construction details.

Finish with cap end unit

- If a cap unit needs to be cut, cut an interior cap, not a cap end unit. Place and glue cap end to finish capping wall.
- Cap end unit may also be used for capping a corner and for step-downs.
- Visit anchorwall.com for installation instructions and construction details.
